

Mr. Mecklenburg, we wanted to thank you for coming to Windsor-Severance Fire Station #1 and helping to kick off our 2008 year. Our goal was to find new and interesting ways to motivate our people because we have both volunteer and career members. You gave such a great motivational talk about "Teamwork" and how that ties into your Six Keys Success. As firefighters, it is critical each and every day to be driven and focused. Each person has to trust the guy/gal behind or beside them on each and every call, and you provided some great insight into the importance of teamwork and goals. Unfortunately we have had several structure fires, however we have been able to see the benefits of your wisdom put into place during these fire ground operations.

We also appreciate your down to earth personality and for sticking around to talk and sign autographs after your presentation. As management staff, we feel we need a lot more of these types of trainings. Again, thank you, and we will highly recommend your message to any company or organization wanting you to inspire their people.

Cordially,

Michael L Davis
Fire Marshal/Division Chief
Fire Prevention/Training Division
